ELEVATE AI by NICE

Uplevel Your Offerings with ElevateAI by NICE
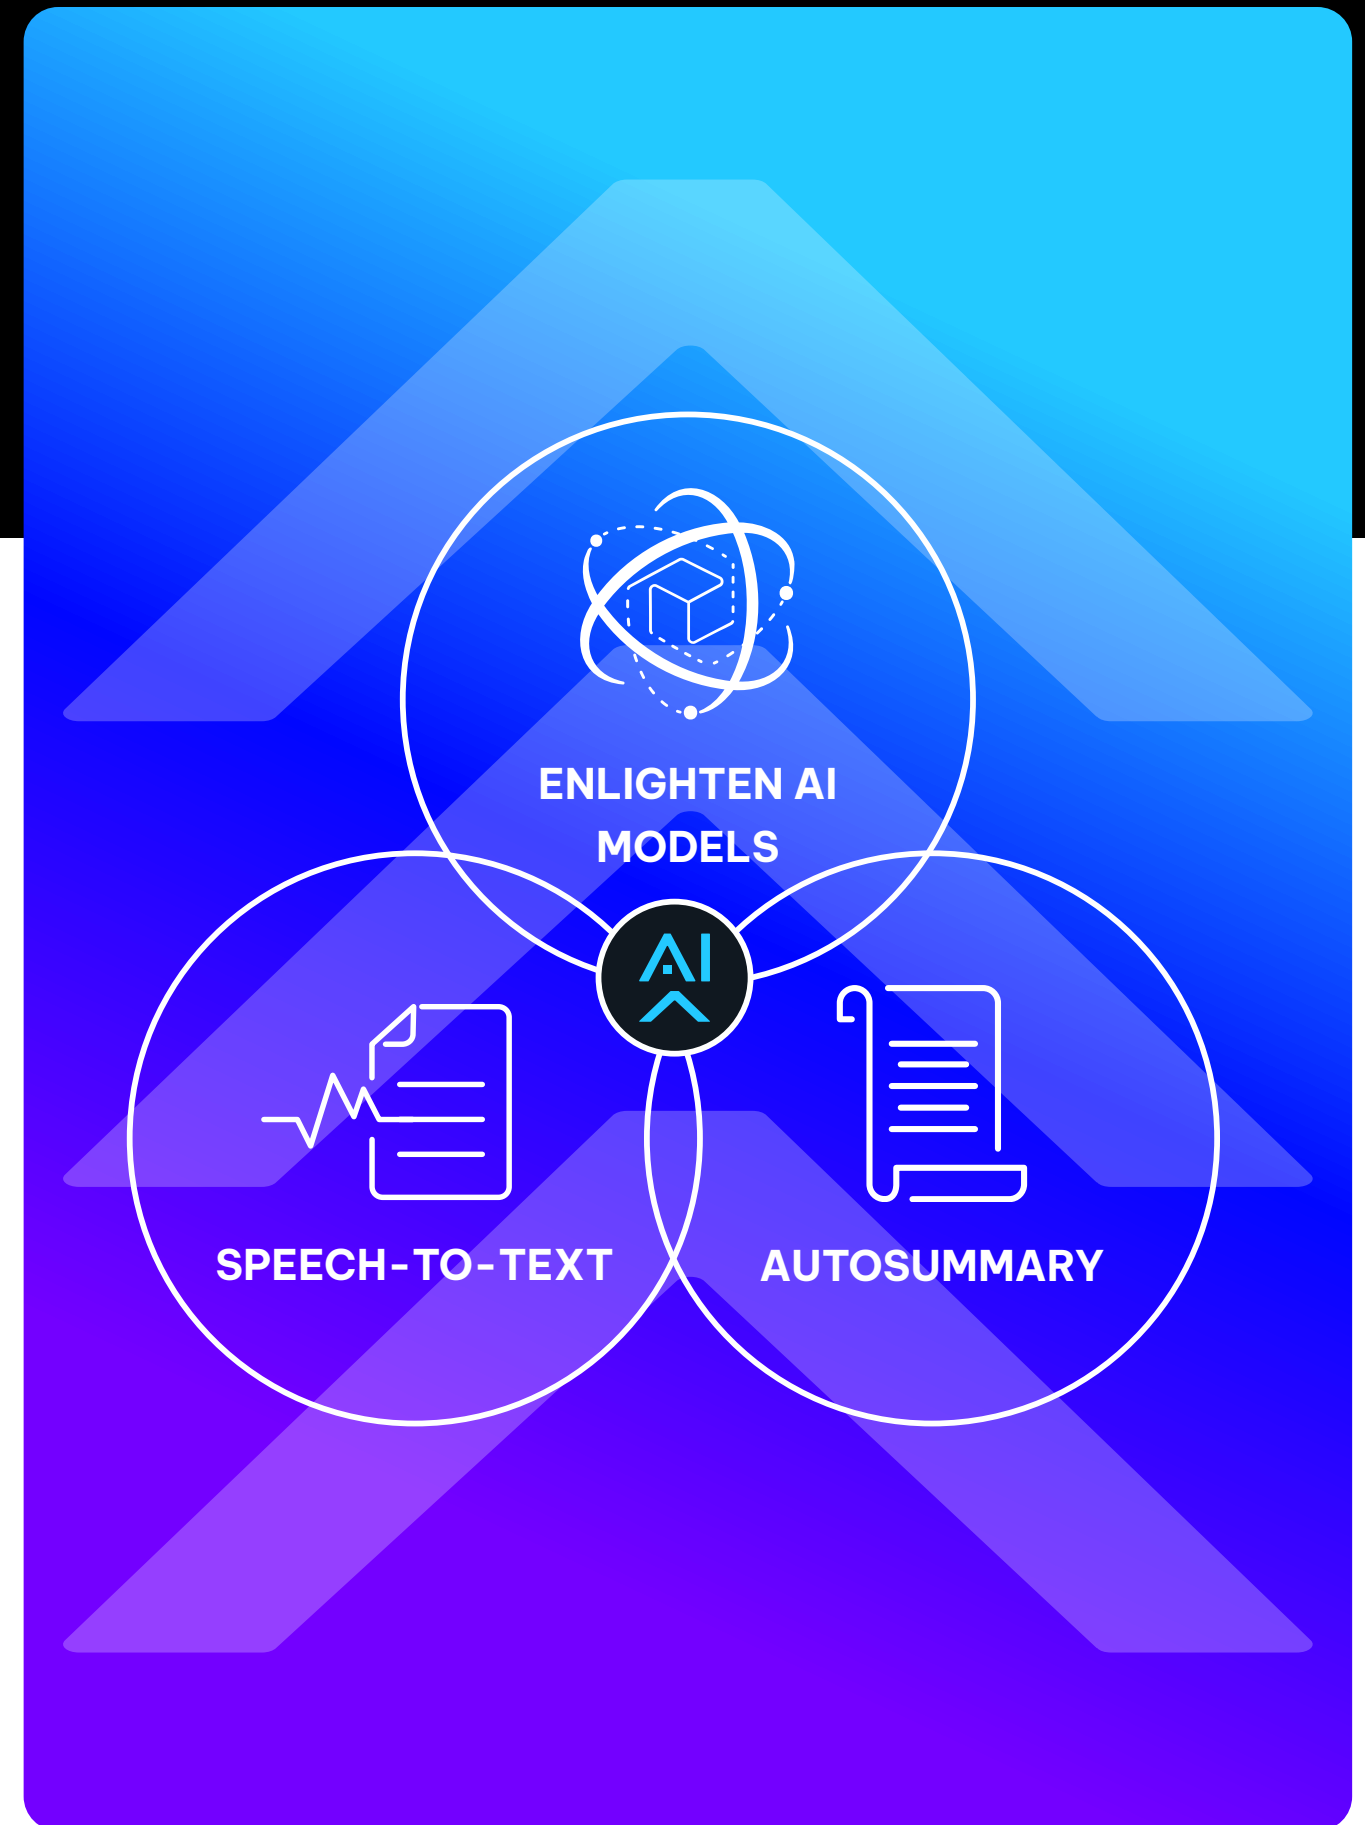

Built on NICE's market leading Enlighten AI technology, ElevateAI delivers access to unmatched transcription quality and CX AI enrichment via Cloud API.

Add NICE's purpose-built CX innovations to your platform with minimal integration and no upfront costs! Gain a market advantage typically reserved for large enterprise platforms with ease and confidence. Suddenly, contact centers of any size can propel their CX strategy to new heights.

Even better? Through our industry-first 1K Every Day program, we give every one of your accounts access to transcription and AI services for 1,000 interactions **for free, every day.**

And it doesn't stop there – 1K Every Day also includes CX AI, as well as access to our just-released Explore dashboards and our Gen AI-powered innovations, CX AutoSummary and Agent Improvement. All aimed at delivering exceptional experiences and constant innovation to every contact center.

That's ElevateAI by NICE.

Try it Now: No Development Required!

The best way to get a feel for the power of ElevateAI is to try it for yourself. Open a free account in seconds and immediately upload calls for processing via the easy-to-use web-based user interface (UI).

Once you are ready to give the API a try, you will find our complete API documentation, to include code samples, on our website.

Have Transcripts?
- Already have your own transcripts? ElevateAI can process your existing transcripts or chat-based interactions, applying CX AI, AutoSummary, and Agent Improvement elements to your text-based input.

Want Analytics and Reporting?
- Introducing **ElevateAI Explore**, our dashboard and widget-based analytics tool! With access to visualizations across your interactions data, ElevateAI Explore allows users to surface patterns and trends in their data without leaving Elevate AI – and without any need for a complex BI integration.

Elevate Your Partnerships — Join our ElevateAI Extend Partnership Program for:
- Discounted processing fees to increase your margins
- Integration design planning and support
- Input into future features and functionality
